

# Modern Software Production: Benefits of an Outsourced Software Supply Chain

Managing & maintaining your software supply chain is not your core business, and it's costing you more than you think. Drawing inspiration from manufacturing, it might be the right time to consider outsourcing your software supply chain, allowing you to focus on your final product.

## Software Factory with Outsourced Supply Chain

- ✓ Securely-built packages
- ✓ Continuous updates
- ✓ Seamless integration
- Reclaim 30% of developer time, so you can
- Release more frequently, so you can
- Close more competitive gaps, and
- Win more business

## Vertically Integrated Software Factory

- ⊗ Risky Community Packages
- ⊗ Ad-hoc Updates
- ⊗ Self-managed & Maintained
- Requires up to 30% of developer time to manage & maintain the software supply chain

“ActiveState is so seamless new engineers don't even know about ActiveState. The team is focused on business and the functional parts.”

– Director of Engineering,  
Druva
